

While a number of committee members chipped in to help, special mention must be given to Annette Veale and Jan Cassell, because, not only did they work throughout the lock down they are continuing to help with sanitization duties, making the cobs for the bar, organizing the Sunday night bingo, and much more.

Many hands make light work as Annette gets to grips with the fluorescent lights

Jan gets into every nook and cranny while cleaning, you won't believe what she found behind the bandit

Lisa joins in with the cleaning and sorting out the notices that had to be put on the floor for COVID-19

Jan's daily work-out pushing the wheelbarrow around the outside of Club

Annette getting down and dirty – no job was too much for these two ladies

The benches were written off until Nogel got his hands on them, they are now at the front of the Club

The Club is lucky to have committee members like these two ladies, who continue to give their time freely in an effort to make the Club a better place to be.

We could do with more committee member like this, so if you can give us some of your time for the benefit of our Club, please see a committee member about putting your name forward to join us.
